

Accounting API's/Sage/Quickbooks API's: *Because it's All About the Bottom Line.*

Almost all corporate operations are tied with accounting at some level.

And no matter which business processes our custom software addresses, we can integrate it with your existing accounting platform—from basic QuickBooks integrations to seamless assimilations with more sophisticated packages such as Sage or Great Plains.

At Cleverttech, we offer financial expertise and experience unmatched by anyone else in the industry:

- We've worked with multinational banks to develop and maintain multi-billion dollar trading systems with demanding international reporting requirements.
- We've integrated online shopping cart operations with QuickBooks online API's for high-volume e-commerce sites.
- And we've tied international warehousing software to banking API's for inventory management, cost of goods sold, AP / AR, bills of materials, purchasing, and other relevant accounting functions.

Our solid expertise in corporate accounting means we can make your company's life easier—streamlining operations by integrating the custom software we build with any accounting platform. Look to us for expert QuickBooks integration API's, bank API's, and more.
